Hyper-V Azure Spring boot
Git LLMs Linux
Wireshark Nmap Bash

Projects

Security Header Scanner
2026

- **Passive web security analysis:** Examines HTTP response headers of public URLs.
- **Framework mapping:** Maps results against regulatory frameworks (-OWASP Top 10, NIS2, ENS, ISO 27001).

[Github/security_header_scanner](#)

Job Board (Fullstack)

- **Backend:** API with **JWT authentication**, DTO data validation, and **PostgreSQL** persistence.
- **Frontend:** Responsive application built with **Dart/Flutter**.
- **Testing:** Implemented using **prompt engineering** and local **LLM models**.

[Github/Job Board](#)

Food_Bites
2025

- **Backend architecture:** RESTful service in **Java** with **Spring Boot**, ensuring scalability, maintainability, and rapid development.
- **Database:** **MySQL** persistence.

Summary

Results-oriented Backend Developer with a strong technical foundation in **Java 17** and **Spring Boot**, and over 15 years of professional experience in high-pressure corporate environments. Proven track record in designing and maintaining **RESTful APIs**, optimizing data access with **SQL/PL-SQL**, and ensuring system reliability through **Unit Testing (JUnit)**. Experienced in cloud-based environments (**Azure**) and containerization (**Docker**).

My background includes implementing security protocols (**NIS2**) and collaborating in **Agile** teams to build scalable, cloud-native products. Native **bilingual** communicator with a proactive approach to troubleshooting, system documentation, and continuous learning.

IT Experience

Mecalux Software Solutions Gijón
Intern / C# Developer 2025 - 2026

- **Backend Development:** Implemented solutions in **C#** and optimized data access through complex queries using **LinQ** and **PL/SQL** for high-availability logistics environments with **Agile** workflows and **Unit Testing**.
- **Cybersecurity and Compliance:** Applied encryption protocols and protection measures for critical data, ensuring alignment with **NIS2** regulatory standards.
- **Infrastructure and Cloud:** Managed virtual and remote environments using **Azure**, **Hyper-V**, and **Horizon VM**, ensuring secure connectivity via **VPN/RDP**.
- **N1 N2 Support:** Proactively **diagnosed** and **resolved** critical issues through **log analysis** and **ITSM tools**, minimizing downtime.

Previous Experience

Hospitality, logistic 2006 - 2025

- Warehouse manager and salesperson at Eurosign |Cangas de Onis: Lead operations using an **inventory management software**, improving the control and **product traceability**.
- Chief machine operator at Lafuente | Arriondas
- Background in hospitality and kitchen management: executive chef Posada del Valle and line chef Casa Marcial and The Royal Oak, England. **Managed teams**, ensured **quality control**, and **optimized resources** and **processes**.
