Languages

English	**Spanish**
native	native

Tools

Security & networking

Nmap	**Wireshark**	**Kali Linux**
Burp Suite	**Gobuster**	**OSINT**
TCP/IP	**DNS**	**Firewalls**
Active Directory	**VPN/RDP**	**Linux**

Development & cloud

Python	**Bash**	**Java 17**
C#	**TypeScript**	**NestJS 10**
Spring Boot	**Azure**	**Docker**
PostgreSQL	**MongoDB**	**Hyper-V**
Git/GitHub	**PL/SQL**	**LinQ**

Projects

QReaper · Anti-quishing analysis

- Detects **hidden phishing in QR codes** in emails, PDFs and images through a 5-stage pipeline: decoding, static URL analysis, headless-browser **sandbox**, risk scoring and PDF report.
- Python, OpenCV, Playwright.

qreaper.es

VulnPrio · Vulnerability prioritization

- SaaS platform for SMEs: analyzes dependencies via **SBOM**, enriches findings with 5 vulnerability sources and prioritizes with deterministic + AI scoring.
- **NIS2** and Spain's **ENS** compliance; CI/CD integration via GitHub Action.

Portfolio/vulnprio (private repo)

Security Header Scanner

2026

- **Passive** audit of HTTP headers on public URLs with a security score (0-100); checks **TLS/SSL**, DNS (SPF/DKIM/DMARC) and technology fingerprinting against a **CVE** database.
- Maps findings to **OWASP Top 10**, **NIS2**, **ENS** and **ISO 27001**; exports PDF/JSON reports.

GitHub/Auditoria-web

Summary

Technical profile focused on **offensive security and vulnerability management**: Master's student in **Cybersecurity and AI** (preparing **eJPT**), with hands-on penetration testing lab practice, participation in **audits of real companies** (black-box and grey-box) and self-built security analysis tools (**QReaper**, **VulnPrio**, **Security Header Scanner**). Experience in L1/L2 support, administering **Azure** and **Hyper-V** environments with VPN/RDP, and applying **NIS2**. Solid backend development background (**Python**, Java, C#) and scripting. Native English.

IT Experience

Mecalux Software Solutions Gijón

Intern / C# Developer 2025 - 2026

- L1/L2 support: proactive diagnosis and resolution of critical incidents through **log analysis** and **ITSM** tools, minimizing downtime.
- Cybersecurity and compliance: applying encryption and critical data protection protocols aligned with the **NIS2** directive.
- Infrastructure and cloud: administration of virtual and remote environments with **Azure**, **Hyper-V** and **Horizon VM**, ensuring secure connectivity via **VPN/RDP**.
- Backend development: **C#** solutions and data access optimization with **LinQ** and **PL/SQL** for high-availability logistics environments, using **Agile** workflows and **Unit Testing**.

Evolve AuditDay 2026

Participant · Master's in Cybersecurity and AI

- Took part in **two security audits of real companies**: one **black-box** (no prior information about the target) and one **grey-box** (partial information).

Labs & Certification

- Ongoing penetration testing practice on **Hack The Box**, **TryHackMe** and **The Hackers Labs**: reconnaissance, enumeration and exploitation of vulnerable machines with Nmap, Gobuster and Burp Suite.
- Preparing for the **eJPT** certification (eLearnSecurity) as part of the Master's.

Hack The Box · **TryHackMe** · **The Hackers Labs**

Education

Evolve Master's • Madrid • Apr 2026 - Dec 2026

Cybersecurity and AI · penetration testing, incident management and defense in depth

IES Juan José Calvo Miguel Sotrondio • 2022 - 2025

Higher Vocational Diploma (FP Superior) in Multiplatform Application Development (DAM)

Mentiona Gijón • 2021

Internet Services Administration · Level 3 professional certificate · networking, Active Directory, IIS, DNS

Previous Experience

Hospitality, logistics 2006 - 2025

- Sales representative and warehouse manager at Eurosigns | Cangas de Onís: operational management using **WMS software** (SGA), improving inventory control and product **traceability**.
- Machine operator in charge at Lafuente | Arriondas.
- Hospitality and kitchen management: executive chef (Posada del Valle) and section chef (Casa Marcial, The Royal Oak, England). **Team management**, **quality control** and process optimization.
